GOLDEN STAR JEWELLERY

RING SIZER

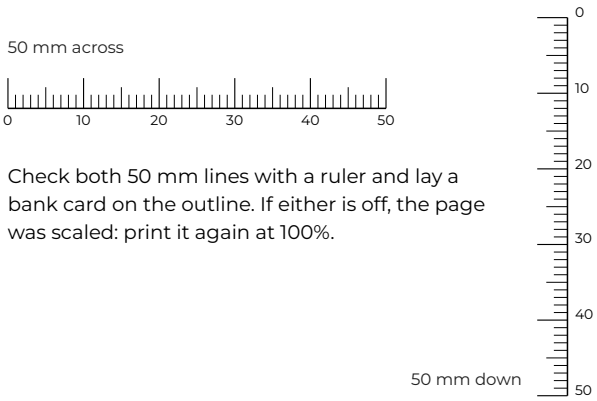

A4 (210 X 297 MM) · CANADIAN AND US RING SIZES
INSIDE DIAMETER (MM) = 11.63 + 0.8128 × SIZE
INSIDE CIRCUMFERENCE = Π × INSIDE DIAMETER

Print at 100% (“Actual size”). Never “Fit to page” or “Shrink to fit”.
Never measure on a screen: a phone or computer screen is never actual size. Measure only on this printed page.

FIRST, CHECK THE PRINT

Lay any bank card here.
It must match this outline exactly, edge to edge.

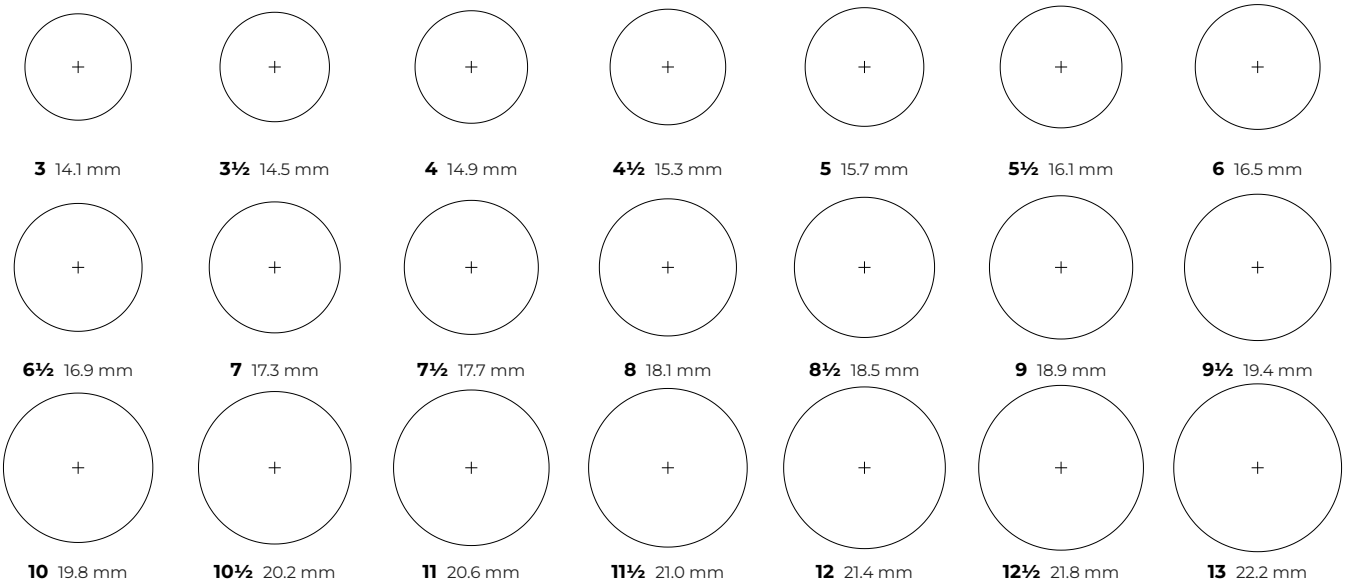

Bank card, ISO ID-1: 85.60 × 53.98 mm

Check both 50 mm lines with a ruler and lay a bank card on the outline. If either is off, the page was scaled: print it again at 100%.

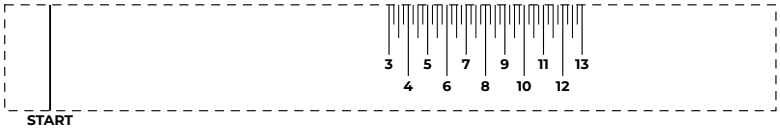

1 A RING THAT FITS — the best way

Take a ring that fits the same finger on the same hand. Lay it flat on the circles: your size is the circle whose line just shows inside the ring, all the way round (the line is the inside edge of the ring). Between two circles? Choose the larger.

2 A PAPER STRIP — no ring to hand

Cut out the strip on the dashed line. Wrap it snugly around the base of the finger, printed side out, with the START end underneath. It must still slide over your knuckle. Your size is the mark that meets the START line. Between two marks? Choose the larger.

Long marks: whole sizes. Middle: halves. Short: quarters. The marks allow for ordinary office paper (75–90 g/m², about 0.1 mm thick).

Good to know
Measure at the end of the day, with warm hands.
Wide band (4 mm or more)? Go up ¼ to ½ size.
Between two sizes? Always choose the larger.
Paper only, never string: string stretches.
